Create your own cargo bike!

Dolly, the brand for a trendy cargo bike, Made in Holland

Are you looking for a trendy cargo bike giving you a sporty ride? Do you want to ride nice and smoothly on an electric cargo bike? Do you want to compose your own cargo bike and choose its colour? Then you have come to the right address. Compose your own Dolly cargo bike or visit one of our Dolly dealers near you and make a test ride.

The design

The Dolly cargo bikes have a unique and original design, they are trendy, lightweight, elegant and are very recognizable because of their specific materials and colours. There are 6 different frame colours and as many as 12 box colours, so numerous colour combinations are possible. A bold, striking, subtle or flashy Dolly cargo bike? You decide!

1st class quality, Made in Holland

The Dolly bikes are manufactured and assembled in-house in The Netherlands, and constructed with the best components there are.

Characteristic for the quality is the extremely strong 3 - layer powder coating on the frame, apart from that stainless steel assembling material is used and the bikes are provided with an ART approved lock, thick Sapim spokes and solid BigBull rims.

Great cycling

The starting point for the design of the Dolly cargo bike was: it shouldn't and can't be more difficult to ride a cargo bike than a traditional city mom bike. To achieve this we chose for an active sit on the Dolly bike, so that you can manoeuvre energetically without much effort, and easily keep up with the other cyclists. The frame is manufactured in the Netherlands and is, therefore, much stiffer than other cargo bikes. Finally, the double-walled synthetic box is a lot lighter than the traditional wooden ones.

Come and visit one of our Dolly cargo bike dealers and make a test ride to experience it yourself!

Accessories

The Dolly cargo bike comes with several accessories which all complete the Dolly and make riding the Dolly bike even more enjoyable. The accessories have been uniquely designed for the Dolly and are made for everyday use.

Luggage rack

The aluminium luggage rack is easy to mount and gives the Dolly even more options to carry goods. The rack is equipped with the GMG easy fit system for child seats, and comes with a strap and a reflector.

Ventisit cushion

The cushion is made of the soft gauze material Ventisit. It is an ideal accessory to make the seat even more comfortable. The cushion is provided with strips of Velcro so it can be removed and installed quickly and easily.

2nd seat

The 2nd seat makes it possible to transport more than one child. The seat has a backrest and comes with 2 sets of three-point seatbelts. Because of the pre-fit holes, the 2nd seat is easy to install.

Maxi-Cosi fitting

The maxi-cosi fitting makes it possible to transport a maxi-cosi safely. Because of the pre-fit holes in the box, installing the Maxi-cosi is easy.

Rain cover

The rain cover (colour black) is made from the solid and strong material Bisonyl. The box can be closed easily with the rain cover, ideal when the Dolly is often outside.

Rain tent

The Bisonyl rain tent (colour black) makes sure the children stay warm and dry in windy, cold and rainy weather. The design makes it possible to attach and remove the tent from the box easily, the rain tent has several useful zippers.

The Dolly with electric assistance

The Edrive system provides the Dolly with excellent and reliable assistance! The Dolly Edrive is always connected to the Nexus 8 gear system, this means your bike does not only run smoothly, it is always in the most comfortable gear.

Long range and reliable root

The Dolly Edrive has a modern 36V-13A battery, attached to a smoothly running 250 watt brushless motor. This gives the Edrive system more range and a smooth, powerful and also very quiet motor. Only the most reliable components have been used for the Edrive. No unnecessary gadgets that can easily cause failure, everything is focused on years and years of uncomplicated pleasure with the Dolly electric cargo bike!

The display is firm and stable and provides 6 assist modes. The display also operates the walk assistance, ideal for turning around in small spaces. The battery is located in the box (under the seat), and because of the efficient cable routing, the beautiful design of the Dolly stays intact. Placing the battery under the seat in the box also ensures that the battery won't get wet.

Braking force

For a cargo bike with electric assistance good braking force is very important. You won't see rim brakes on the Dolly Edrive, the Edrive is always equipped with the powerful Shimano IM81 rollerbrakes on the front and rear wheel.

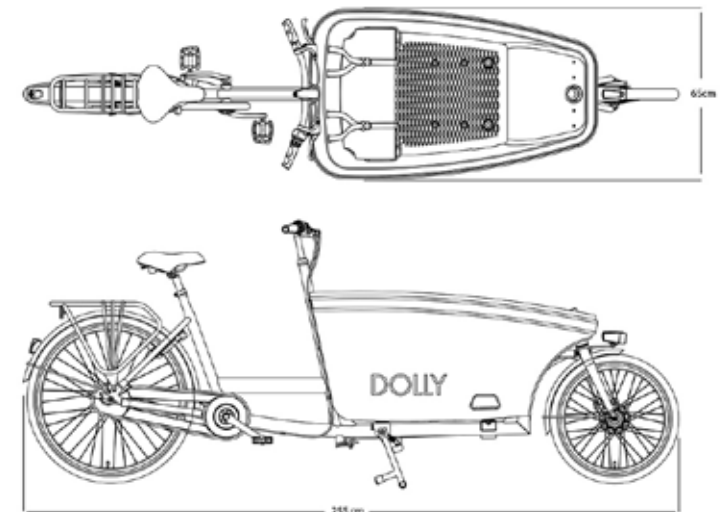

The Dolly Edrive, always tailwind! A great electric cargo bike!
